EMPLOYMENT

- 2016 - Present ADVENT HEALTH PARTNERS
Sr. Software Engineer
Joined a small team with a frontend focus in converting from AngularJS to Angular. Built new features per internal and client request in Angular and React/Redux. Assisted in build process conversion from JSPM to Webpack 2.
- 2016 17HATS, LLC.
Sr. Full-Stack Engineer
Led team into our first full React and Alt implementation and refactored legacy Perl and KnockoutJS code to Rails/React/Alt. Participated in daily standups, pairing sessions, and review of pull requests. Mentored team members into React & Alt implementation and best practices.
- 2015 MOJOTECH, LLC.
Full-Stack Engineer
Built several applications for clients in an agency environment using primarily Ruby on Rails with extensive JavaScript framework exposure, including React, Angular, and Backbone.
 - Given a raise in under 6 months for exceeding expectations and meeting all given goals for growth early.
- 2014 - 2015 MYHUB, LLC.
Full-Stack Rails Developer
Assisted as part of a team in a rescue project to rewrite most of the legacy API to utilize new frontend design patterns, and eliminate pre-existing bugs.
 - Implemented automated deploys (Capistrano & AWS).
- 2012 - 2014 REQUIRE(DEV), LLC.
Co-Founder, Sr. Developer
As Co-Founder I had several roles including backend and frontend development, accounting, project management, contract drafting, and administration of internal systems..
- 2011 - 2012 GODADDY.COM
Linux Systems Administrator
Fixed automation issues as 3rd tier support within the hosting environment; involved identifying the root cause, and providing a scripted fix that could be deployed to the grid hosting platform.
- 2009 - 2011 LATISYS, LLC.
Systems Engineer
Hired as a NOC technician in a data center environment. Primarily provisioned server orders, VMWare ESXi, and performed cluster, failover, Cisco network, and ASA/ACE firewall configurations.
